

Hermeneut

HERMENEUT invites you to join our 1st workshop on insurance in cybersecurity, to be held on the 5th of July 2018 in Milan (IT), at Centro Congressi Copernico, Via Copernico 38 Milano.

The workshop aims at discussing the state-of-the-art of the cyber-security market. A community of researchers and practitioners, including brokers and insurers, will convene in Milan to identify **future trends and challenges in the cyber-security insurance market**, with a special focus on compliance with the new regulations and best practices to implement.

The one-day workshop will also be the occasion for HERMENEUT to present, receive feedback on and discuss possible applications of the models and methodologies for **cyber-security risk assessment and cost-benefit analysis** developed within the project by experts in the field.

Participation is free but registration is needed: fill in this form to register! <https://tinyurl.com/Hermeneut1st>

Event Agenda | Milan, 5th of July 2018

10.00 – 10.30 Welcome Coffee

10.30 – 10.40 Welcome and Introduction. Alessandra Tedeschi, *Deep Blue*

10.40 – 11.00 The Cyber-insurance in the Cyber-security Landscape: an Overview. Alexander Szanto, *BIGS*

11.00 – 12.00 The HERMENEUT Project

Proactive estimation of vulnerabilities. Enrico Frumento, *CEFRIEL*

Micro and macro-economics models of intangible cyber-costs. Ahmed Bounfour, *Université Paris-Sud*

Risk based cost&benefit framework. Carlo Dambra, *PROPRS*

12.00 – 13.30 The EU Cyber-insurance Market: Stakeholders' View

A Proactive Approach to Cyber Insurance. Attilio De Bernardo, *AIG*

The Impact of Insurance on Cyber Risk. Marek Stanislawski, *Allianz*

How the Broker Stimulates the Insurer to Find Coverage for Cyber Insurance. Luke Foord-Kelcey, *AON Benfield*

Cyber Insurance Solutions in Europe and Worldwide. Martin Kreuzer, *Munich RE*

13.30 – 14.30 Lunch

14.30 – 16.00 Round Table – Trends and Future Challenges in the Cyber Insurance Market

Moderator: Alessandra Tedeschi, *Deep Blue*

Speakers: Carlo Savino, *ANIA*, Alessandro De Felice, *ANRA*, Christopher MacEvoy, *Partner RE*,

Raoul Brenna, *CEFRIEL*.

16.00 – 16.15 Wrap - Up

The HERMENEUT project assesses and quantifies the consequences of cyber-attacks on assets, and the losses related to intangible assets.

It innovates with a unique cyber-security cost-benefit analysis approach that combines up-to-date modern attack trends, integrated assessment of vulnerabilities and likelihoods of cyber-attacks with an innovative macro- and microeconomic model of intangible costs, to deliver risk estimations for individual organisations, sectors and the economy. It then provides investment guidelines for mitigation measures. HERMENEUT also delivers a decision support tool to decision makers and validates it in two sectors increasingly under cyber-attack: health-care and an Intellectual Property-intensive industry.
